## Bluesky Business Services reduced debtor days by 50% with GoCardless

### Chasing late payments was an ongoing distraction

Bluesky Business provide professional book-keeping and accounting services. As a growing business, it was important for them to maintain strong cashflow to finance new hires, and maintain a clear sales ledger and forecast.

Only 20% of customers, however, were paying within the required 30 days. “We used to spend two full days a month just chasing clients for payment,” says Emma Mills, Director. They were left with never-ending uncertainty of when clients would pay, which was often up to three months late.

### They took control with an automated Direct Debit solution

Bluesky needed an assured payment system that integrated with their Sage 50 accounts, and quickly turned to the GoCardless add-on. Now, when each invoice is due, it is automatically collected from client’s accounts, and marked as “paid” in Sage.

Within a month of switching to GoCardless, 70% of BlueSky’s clients signed up to Direct Debits. “Our cashflow and business have been transformed since we started using GoCardless. We’ve got the time now to really grow the business.”
